

# BACHELOR OF PUBLIC HEALTH

*Prepare for a future in healthcare.*

## Program Overview

The University of Kentucky's Bachelor of Public Health (BPH) is for the student interested in positively impacting the health of people and communities.

Public Health focuses on populations with an integrated approach of identifying behaviors that affect health; preventing disease and premature death; promoting health-care equity, quality, and accessibility; and transforming healthcare systems.

## Why Public Health?

The BPH curriculum offers flexible course options for students who want to start a career immediately upon graduation or prepare for further education.

## Student-Body Characteristics

- > 35% First-Generation Students
- > 21% Underrepresented Minority Students
- > 16% Appalachian Students
